KeyGuard combination key cabinets are the latest security innovation from FJM Security. The new line combines durability and reliability with the

convenience of keyless security at a competitive price!

Durability

- Heavy gauge steel
- Continuous "piano" hinge
- Steel key hooks

Reliability

- Reliable three dial combination security
- 1,000 possible codes
- All metal construction

Convenience

- Change code easily in seconds
- Mounting hardware included
- Color coded key tags included
- No need to use keys to manage keys!

Value

- Competitively priced
- 1 year limited warranty

Easily set the combination by holding in the reset button and rolling the dials to a new combination. The combination can be changed at any time! Combination locks are a tried and true mechanical locking system that have been tested over time with none of the reliability issues that occur with plastic punch button lock systems.

The steel key box has a continuous hinge for added security. Keys can be hung either on steel hooks or used with the included key tags.

The multi-colored key tags are easy to reuse by inserting new labels. Find free label templates, key location charts, sign-out forms and other helpful key management tools at www.combination-key-cabinet.com
